

qlGen User Guide

AI-Powered Qualified Lead Generation

What is qlGen?

qlGen helps you build a pipeline of qualified leads in minutes. You define your Ideal Customer Profile (ICP) · the type of company and decision-maker you want to sell to · and qlGen AI agent automatically:

- 1 **Discovers companies** matching your criteria
- 2 **Finds key contacts** (decision-makers) at each company
- 3 **Enriches contact details** · emails, phone numbers, LinkedIn profiles
- 4 **Scores every lead** using the BANT framework (Budget, Authority, Need, Timing)

The result is a sales-ready list you can export to Excel and start working immediately.

Navigation

The top navigation bar has three sections:

Menu Item	What It Does	
Home	Landing page with quick-start buttons	Dashboard Overview of all your searches and aggregate stats
Saved ICPs	Your saved Ideal Customer Profiles (reusable)	

Getting Started: Your First Search

Step 1 · Create a New Search

From the **Home** page, click "**Start Your Search**". This opens the ICP Configuration wizard.

Alternatively, you can click "**New Search**" from the **Dashboard** or the **Saved ICPs** page.

Step 2 · Fill in the 9-Step ICP Wizard

The wizard walks you through defining your ideal customer. Each step captures a different dimension. You can navigate between steps freely by clicking the step numbers on the left sidebar.

Step 1: Offering

- **Name** (required): Give this search a descriptive name, e.g., "*MidMarket US ECommerce Q1 2026*"
- **Description**: Optional short summary
- **Target Offerings / Service Areas**: The products or services you want to sell. Press Enter or click "Add" after typing each one.

Tip: If you have ICP data in a spreadsheet, click "**Import from Excel**" at the top of this step to pre-fill the wizard. You can download a template first.

Step 2: Regions

- **Target Countries**: e.g., *United States, United Kingdom*
- **Priority Areas**: Specific states or cities, e.g., *California, New York, London*

Step 3: Industry

- Add one or more industry verticals (e.g., *E-Commerce*) with optional sub-verticals (e.g., *Fashion & Apparel*)
- Click "+ **Add Industry**" to add more rows

Step 4: Size

- **Employee count range:** Min and max headcount
- **Revenue range:** Currency, min, and max revenue

Step 5: Tech (Technology Maturity)

- **Positive signals:** Technologies that indicate a good fit, e.g., *"Running on Shopify Plus"*
- **Negative signals:** Migration needs or outdated tech, e.g., *"Legacy Magento 1"*

Step 6: Infra (Infrastructure Readiness)

- Indicators that the company is technically ready, e.g., *"Cloud-hosted storefront"*

Step 7: Drivers (Digital Transformation Drivers)

- **Growth Triggers:** e.g., *"YoY revenue growth >20%"*
- **Operational Pains:** e.g., *"Site performance degrading during peak traffic"*
- **Competitive Pressures:** e.g., *"Rising customer acquisition cost"*
- **Strategic Initiatives:** e.g., *"Launching mobile app"*

Step 8: Leadership

- **Target Roles:** Job titles you want to reach, e.g., *CTO, VP of Engineering, Head of Digital*
- **Behavioral Traits:** e.g., *"Data-driven decision maker"*

Step 9: Review

- A summary of everything you entered. Scan it to make sure nothing is missing.
- Click "**Save & Run Search**" to save the ICP and immediately start the lead generation pipeline.
- Click "**Save Only**" if you want to save the ICP for later and run it another time.

Step 3 · Watch the Pipeline Run

After clicking "**Save & Run Search**", you are taken to the **Pipeline Progress** page. Here you can see the AI agent working in real time:

- **Left panel:** Shows the 4 stages · Company Discovery, Contact Discovery, Enrichment, BANT Scoring · with progress indicators
- **Right panel:** A live activity log showing every data source lookup as it happens
- **Bottom bar:** Running totals of companies found, contacts found, tool calls, and elapsed time

You can safely leave this page. Results are saved automatically. Come back anytime via the Dashboard.

A typical search runs for **3-8 minutes** depending on how many companies match your criteria.

Step 4 · View Your Results

When the search completes, click "**View Leads**" (or find the search on your Dashboard and click it).

The **Search Results** page has three tabs:

Companies Tab (default)

A table of all discovered companies and their contacts:

Column	What It Shows	#	Row number
Company Name	The discovered company	BANT Score	Lead quality rating
(HOT / WARM / COOL / COLD) out of 20	Website	Company website (clickable link)	
Geo/City	Location	Contact Name	Decision-maker's name
Designation	Job title	LinkedIn	Link to their LinkedIn profile
Email	Professional email address	Phone	Phone number

Click any row to expand it and see:

- **Company Insights:** ICP match score, estimated revenue, employee count, tech stack, and an overview of why this company was matched
- **BANT Breakdown:** Detailed scores and reasoning for Budget, Authority, Need, and Timing, with source citations

Search Criteria Tab

Shows the ICP configuration that was used for this search.

Search Summary Tab

An overview of how the search was conducted:

- Time taken, sources searched, total lookups
- Which data sources contributed (with bar charts)
- Data completeness metrics (% of contacts with email, phone, LinkedIn)

Step 5 · Export to Excel

On the Companies tab, click "**Export Excel**" in the top right. This downloads a formatted .xlsx file with all companies, contacts, BANT scores, and details · ready to import into your CRM or share with your team.

Understanding BANT Scores

Every company is scored on 4 dimensions, each rated 0-5:

Letter	Dimension	What It Measures	B	Budget	Does the company have the financial capacity?	A	Authority	Did we reach the right decision-maker?	N	Need	Does the company have a clear need for your offering?	T	Timing	Is there urgency or a near-term trigger?
--------	-----------	------------------	---	--------	---	---	-----------	--	---	------	---	---	--------	--

Total score is out of 20. The color-coded labels mean:

Score Range	Label	What It Means
16-20	HOT	High-priority lead · reach out

immediately || 12-15 | **WARM** | Good potential · worth pursuing soon | 9-11 | **COOL** | Some potential
· may need nurturing | 0-8 | **COLD** | Low match · deprioritize for now |

Managing Your Saved ICPs

The **Saved ICPs** page lists all your ICP configurations. From here you can:

- **Search:** Use the search bar to filter by name or description
 - **View Details:** Click any card to see the full ICP configuration
 - **Edit:** Click the "Edit" button or use the "..." menu on any card
 - **Run Pipeline:** Use the "..." menu and select "**Run Pipeline**" to start a new search with an existing ICP
 - **Delete:** Use the "..." menu to delete an ICP you no longer need
 - **Import from Excel:** If you have multiple ICPs to create, use the bulk import feature on the empty state
-

Using the Dashboard

The **Dashboard** gives you a bird's-eye view:

Summary Tiles

- **Total Searches:** How many search pipelines you've run (click to see a list)
- **Qualified Leads:** Total contacts found across all searches (click to see per-ICP breakdown)
- **Companies Found:** Total companies discovered (click to see per-ICP breakdown)

Recent Searches

Cards showing your latest searches with:

- Status badge (Completed, Running, Failed)
- Company and contact counts
- ICP details (regions, industries, roles)
- Quick actions: Edit the ICP, delete the search, or view results

Use the **search bar** and **status filters** (All, Completed, Running, Failed) to find specific searches.

Bulk Import: Multiple ICPs from Excel

If you need to create several ICPs at once:

- 1 Go to **Saved ICPs** page
 - 2 When the page is empty, click "**Import from Excel**", or use the import option in the ICP wizard
 - 3 **Download the template** · it has 8 sheets matching the 8 ICP dimensions
 - 4 Fill in your data. Use the "ICP Name" column to define multiple ICPs in the same file
 - 5 Upload the completed .xlsx file
 - 6 Review the parsed ICPs and click "**Save All**" or "**Save & Run All**"
-

Tips for Better Results

- 1 **Be specific with your ICP:** The more detail you provide (industries, regions, company size, tech signals), the more targeted and useful the results will be.
 - 2 **Use multiple target roles:** Adding 3-5 leadership roles (e.g., CTO, VP Engineering, Head of Digital) increases the chance of finding the right decision-maker at each company.
 - 3 **Add technology signals:** If your offering relates to specific tech stacks, mentioning them helps the AI find companies with relevant infrastructure.
 - 4 **Review and re-run:** After seeing initial results, you can edit your ICP to refine criteria and run a new search. Each run is independent.
 - 5 **Export early, export often:** Download the Excel file to share with your team or import into your CRM. You can re-export anytime.
 - 6 **Focus on HOT and WARM leads first:** Sort by BANT score (default) and prioritize the top-scoring companies for outreach.
-

Frequently Asked Questions

Q: How long does a search take? Typically 3-8 minutes depending on the breadth of your ICP criteria and how many companies are found.

Q: Can I leave the page while a search is running? Yes. Results are saved automatically. You can close the tab entirely and come back later via the Dashboard.

Q: How many companies does each search find? Each search is configured to find up to 15 companies with up to 5 contacts per company. These are the most relevant matches for your criteria.

Q: Can I run the same ICP multiple times? Yes. Each run is independent. You can re-run from the Saved ICPs page, the Dashboard card, or the "Run Again" button on the results page.

Q: What data sources does qlGen use? qlGen searches across 7 professional data sources: Apollo.io, Exa.ai, Hunter.io, Lusha, Tavily, DuckDuckGo, and direct company website analysis.

Q: Can I edit an ICP after saving it? Yes. Go to Saved ICPs, click the card, and choose "Edit". Changes are saved without affecting previous search results.

Q: What format is the export? Excel (.xlsx) with formatted columns and styling, ready for direct use or CRM import.
